

TD's UNI-versity Night. One. PROFS

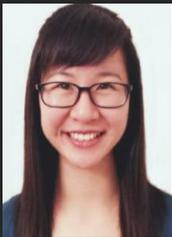

SANDRA HSIEH

Sandra studied mathematics at UCLA receiving her B.A. in Mathematics and then earned her M.S. in Applied Mathematics from the University of Washington. After finishing her Masters degree, she taught math full-time at both Long Beach City College and Pasadena City College. She enjoys explaining mathematical concepts, using analogies, trying to make complex concepts more accessible and understandable to struggling math students. She is excited to have the opportunity to use mathematics to elucidate concepts that are found in Scripture, the greatest Textbook of life!

EUNICE IM

As a sibling of someone with autism, Eunice has a vested interest in the successful inclusion of people with disabilities in community life. Through volunteer opportunities at Special Olympics and Joni and Friends Family Retreat, she learned that her sister is not the only one experiencing disability-related challenges. In order to become better equipped to address issues in the field, she pursued various training opportunities, such as the UCLA Disability Studies minor and the California Leadership Education in Neurodevelopmental Disabilities Fellowship in Family Support.

REBECCA CHEN

Rebecca has often described herself as "having artistic ability but not much creativity." However, creativity is about seeing and deepening connections - between roles, relationships, and realities. Whether through skit-writing, story-telling, drawing, or design, the creative process has always led her to recognize patterns and understand truths even as she sought to capture and express them. She believes that creativity and the arts are a platform God uses to testify to who He is and what He is like, and that we are likewise to use this platform to glorify God, build up the church, and reach the lost.

DANIEL HSIEH

Daniel's search for a way to understand giant questions - What is life about? What is God like? Why do I feel so restless?, et cetera - has led him into the general field of the Humanities, particularly the study of literature. He also spends some time in the related fields of music, philosophy, and theology. Though ensconced in an academic setting, pursuing "heady" questions, Daniel is a believer in the notion that the most meaningful intellectual activity is done in a relational context. He therefore hopes to further discover how intellectual material can be more communal than isolating. Those he identifies as most influential in his thinking are C.S. Lewis, Ravi Zacharias, R.C. Sproul, Michael Dean Clark, and Jon Foreman.

"... to equip His people for works of service, so that the body of Christ may be built up until we all reach UNITY in the faith and in the knowledge of the Son of God and become mature ..." Ephesians 4:11-13
